

PRESS RELEASE

San Juan Puerto Rico MaxiCourse Announces New 2026–2027 Cohort in Oral Implantology

San Juan, Puerto Rico, March 11, 2026 — Dental professionals seeking to expand their clinical expertise in oral implantology will have a new opportunity with the official announcement of the San Juan, Puerto Rico MaxiCourse 2026–2027, an advanced educational program designed to provide comprehensive training in oral implantology, specialized surgical techniques, and clinical sedation.

The program brings together a distinguished international faculty composed of recognized specialists in oral surgery, implantology, and dental rehabilitation. Participating instructors include Dr. Daniel Becker, Dr. Steve Shufflebarger, Dr. Walter Chitwood, Dr. Victor Cardona, Dr. Daniel Velázquez, Dr. Wesley Shankland, Dr. David Resnick, Dr. Joseph Boone, Dr. Andy Burton, and Dr. José Pedroza, who will contribute their extensive clinical and academic expertise throughout the program’s sessions.

TADII Schedule 2026 - 2027

“This program represents a unique opportunity for dental professionals to strengthen their surgical skills and expand their knowledge in advanced oral implantology. Our goal is to provide rigorous training based on clinical experience and the most current techniques in modern implant dentistry,” said Dr. José Pedroza, Director, Instructor, and Mentor of the San Juan Puerto Rico MaxiCourse.

The MaxiCourse will be delivered through a series of intensive modules running from November 2026 through July 2027, covering essential and advanced topics in modern implantology, including:

- principles of oral implantology
- surgical techniques and soft tissue management
- maxillary sinus augmentation techniques
- bone grafting and PRF
- digital implant dentistry
- applied orofacial anatomy related to implantology
- intravenous clinical sedation
- management of advanced surgical and prosthetic cases

The sessions will combine **didactic instruction, clinical training, and hands-on experience**, allowing participants to strengthen their surgical capabilities and expand their expertise in one of the fastest-growing fields in modern dentistry.
